## Company Profile

SPECTRUM DRILLING TOOLS INTERNATIONAL (SPECTRUM) is located in the mesmerizing Sun City of Jodhpur, Rajasthan, India. It manufactures highly precise, quality products with micron accuracy to meet the requirements of the Oil & Gas industries and other large-scale industries involved in the manufacture of sophisticated machinery and equipment.

The company is an established and approved manufacturer/supplier for major Oil & Gas and shipping companies in India. It also exports products to the USA, UAE, Singapore, etc., and has an authorized supply house in the UAE.

Our highly skilled team and process engineers are capable of manufacturing a wide range of oil well drilling rig equipment, drilling tools, assemblies, components, and spare parts to cater to all Oil & Gas industries internationally, adhering to international standards. We also produce other essential equipment, components, assemblies, and spare parts as per customer requirements and specifications/drawings. This is backed by world-class brands of automated machines such as CNC VTL cum turn-mill, Vertical Machining Centre (VMC), and CNC Lathe Machines from Doosan, South Korea.

Besides the above, the company has a well-trained team of Quality Assurance Engineers with all types of in-house testing facilities compliant with international standards to ensure the quality, durability, and safety of our products. The company ensures the testing and inspection of the following vital tests or as applicable to meet requirements.

- Chemical Test
- Mechanical Test
- Structural Analysis
- Impact Test
- Radiographic Test
- Ultrasonic Test
- MPI Test
- Torque Test
- Proof Load Test

We also have authorization from various renowned Oil & Gas equipment manufacturing companies to sell their products in India and abroad. We are one of the established sources for supplying such products to major Oil & Gas companies in India.

***Our Team and technology are our strengths.  
Quality, accuracy, and commitment are our aim.  
Customer satisfaction is our motto.***

## Master Bushings

### MPCH Master Bushing for National, Oilwell & EMSCO Rotary Table

Spectrum Drilling Tools International specializes in manufacturing Rotary Bushings, confirming API-7K specifications. Our MPCH Master Bushings are designed for rotary tables sized 37.1/2" to 49.1/2".

The MPCH is a pin-driven hinged Master Bushing. The Master Bushing can be configured to fit in Rotary Tables of various manufacturers and configurations on special request. The MPCH will be delivered based on customer order. With the help of Insert Bowls, it is capable of handling Drill Collar, Tubing, and Casing ranging from 2.3/8" to 13.3/8". The standard delivery with Insert Bowl No.3 is recommended by Spectrum Drilling Tools, while the optional Insert Bowl No.1 and No.2 are designed to enhance the pipe, Drill Collar, Tubing, and casing handling range.

#### Master Bushing is supplied along with the following :

- Lifting Slings: Chain Type with four hooks for Master Bushing & Two hooks for Bowl for lifting purposes.
- Bit Breaker Adapter Plate: For makeup and breakup of bits.
- Insert Bowls: Bowls No. 1, 2 & 3 to handle different sizes of tubular. (Optional)

## Solid Body Pin Drive Master Bushing

### Model: SDTI 2750-PS for 27.1/2" Rotary Table & SDTI 2050-PS for 20.1/2" Rotary Table

The Spectrum Drilling Tools International Solid Body Pin Drive Master Bushing is designed for 20.1/2" and 27.1/2" Rotary Tables. This Pin Drive Master Bushing allows the use of Insert Bowls in the Rotary Table while the Kelly Bushing is in operation.

With the appropriate Insert Bowl, the Master Bushing can support a maximum string load of 500 tons. Insert Bowls offer superior slip backup and are engineered to handle heavier tubular strings without the risk of string failure due to bottlenecking. These Insert Bowls, also compliant with API-7K specifications, can accommodate tubular sizes ranging from 2.3/8" to 13.3/8".

The Model SDTI 2750-PS Master Bushings are equipped with bowl locks to securely hold the Insert Bowls in place.

#### Part List of Solid Body Pin Drive Master Bushing:

(Interchangeable with Varco MSPC or any other Master Bushings that comply with API-7K standard)

## Solid Body Square Drive Master Bushing

### Model: SDTI 2750-SS for 27.1/2" Rotary Table & SDTI 2050-SS for 20.1/2" Rotary Table

The Square Drive Master Bushing, confirming API-7K specifications, is ideal for drilling operations up to 10,000 feet where a large slip backup area is not required. The Solid Outer Body is engineered to support all transverse loads and provides suitable backing for Split Insert Bowls, even during active drilling with the Rotary Table.

Model SDTI 2050-SS accommodates tubular sizes ranging from 2.3/8" to 10.3/4" OD, while Model SDTI 2750-SS handles tubular sizes from 2.3/8" to 13.3/8" OD, utilizing Insert Bowls.

The following are the recommended accessories for these Master Bushings:

1. Bit Breaker Adapter Plate.
2. Lifting sling.
3. Insert Bowl No.1,2 & 3

#### Part List of Solid Body Pin Drive Master Bushing:

(Interchangeable with Varco MSPC or any other Master Bushings that comply with API-7K standard)

6.	Insert Bowl No.1 For 11.3/4" to 13.3/8" Tubular	1 No.	2756-PS	–

Note: In addition to the standard models, Master Bushings can also be custom-made to meet specific customer requirements

## Split Type Pin Drive Master Bushing

### Model: SDTI 2750-PSP-3

Spectrum Drilling Tools International manufactures Split-Type Pin Drive Master Bushings designed for 27.1/2" Rotary Tables, confirming API-7K specifications. These Master Bushings are compatible with Insert Bowls Nos. 1, 2, and 3, allowing them to handle various tubular sizes, including Drill Collars, Tubing, and Casing ranging from 2.3/8" to 13.3/8".

The advantages of the Split Type Pin Drive Master Bushing include:

- The Master Bushing can be easily removed to allow large-diameter bits and pipe connections to pass through.
- The BOP (Blowout Preventer) can be easily lifted by removing the Master Bushing from the Rotary Table.
- The Master Bushing can be securely locked into the Rotary Table, with locks that firmly hold the Insert Bowls in place.

The following are the recommended accessories for this Master Bushing:

- Bit Breaker Adapter Plate.
- Lifting sling.
- Insert Bowl No.1,2 & 3

### Part List of Split Type Pin Drive Master Bushing:

S. No.	Description	Qty Per Unit	P/N
1.	Bare Body	1 No.	2751-PSP-3
2.	Bowl Lock Assembly	2 No.	2752-PSP-3
3.	Drive Hole Bushing	4 No.	2753-PSP-3
4.	Lifting Sling (Two Hooks Type)	1 No.	2754-PSP-3
5.	Bit Breaker Adapter Plate	1 No.	2755-PSP-3
6.	Insert Bowl No.1 For 11.3/4" to 13.3/8" Tubular	1 No.	2756-PSP-3
7.	Insert Bowl No.2 For 9.5/8" to 10.3/4" Tubular	1 No.	2757-PSP-3
8.	Insert Bowl No.3 For 2.3/8" to 8.5/8" Tubular	1 No.	2758-PSP-3

## Medium Duty Split Type Pin Drive Master Bushing - Bowl 3 Taper Design

**Model: SDTI 2750-PSP for 27.1/2" RT**  
**SDTI 2050-PSP for 20.1/2" RT**

**SDTI 1750-PSP for 17.1/2" RT**  
**SDTI 2750-SSP for 27.1/2" RT**

These Master Bushings are designed for shallow to medium-depth wells, compatible with 17.1/2", 20.1/2", and 27.1/2" Rotary Tables. Manufactured in strict accordance with API-7K specifications, the PSP (Pin Drive Split Type) and SSP (Square Drive Split Type) models feature a standard taper of Insert Bowl No. 3, accommodating tubular sizes from 2.3/8" to 8.5/8". These models also allow the use of extra-long SDXL slips for handling heavier loads.

The 2.1/2" rise in taper facilitates easier slip handling, uniformly distributing the load within the Master Bushing and reducing wear and tear on the table bore. This design provides 50% more slip support, enhancing load management capability. The 27.1/2" Master Bushing is engineered to handle string loads up to 500 tons.

 Figure No. 9

## Casing Bushings and Insert Bowls

When the casing is inserted into a drilled hole, the casing string must align precisely with the hole's center. This alignment ensures that cement slurry is evenly distributed around the casing, promoting effective bonding between the casing and the borehole. Casing Bushings are employed to ensure that the casing being run maintains perfect alignment with the center of the hole.

Casing Bushings are available in either solid or split types, and all variants can accommodate bowls of different sizes to cater to a wide range of casing dimensions. They are directly installed into the Rotary Table, and by using CMS-XL or CP-S slips, the casing string can be easily rotated during cementing operations. Casing Bushings are designed to handle string loads of up to 500 tons.

Rotary Table Size	Suitable for R.T.	Casing Size (In Inches)	Casing Bushing P/N	Insert Bowl P/N

Recommended Accessories with Casing Bushing are: 1. Lifting Sling 2. Insert Bowl No. 1,2,3 & 16 (Optional)

Note: Casing Bushings can also be custom-made according to specific customer requirements upon request.

## Adapter Ring

Spectrum Drilling Tools International produces a diverse selection of Rotary Adapter Rings or Reducer Bushings designed for 75.1/2", 60.1/2", 49.1/2" and 37.1/2" Rotary Tables. These adapter rings serve the purpose of reducing the rotary bore size. They come in both solid and hinged designs, offering versatility in application.

Additionally, the configurations of these rings can vary from one rotary maker to another or even from one brand to a different brand (e.g., Oilwell to National). These Adapter Rings are made strictly following the latest edition of API-7K specifications.

Adapter Ring

3.	From National 49.1/2" to National 37.1/2" RT	Hinged	1500	6003
4.	From National 49.1/2" to National 37.1/2" RT	Solid	1500	6004
5.	From National 37.1/2" to API Standard 27.1/2" RT	Hinged	750	6005
6.	From Oilwell 37.1/2" to API Standard 27.1/2" RT	Hinged	750	6006
7.	From EMSCO 37.1/2" to API Standard 27.1/2" RT	Hinged	750	6007

Note: Customized Adapter Rings are also available upon request.

## Wear Guide Assembly

The Wear Guide Assembly is essential for minimizing wear and tear on Master Bushings and Insert Bowls during drilling operations, particularly when using a top drive. It plays a crucial role in protecting the drilling string by centralizing it, thereby reducing the risk of damage to the insert bowls throughout the drilling or tripping process.

This assembly is designed to be mounted directly into the pin drive locations on 27.1/2" & 37.1/2" Master Bushings. With the assistance of Insert Sets, the Wear Guide Assembly can accommodate tubular sizes ranging from 3.1/2" to 6.5/8".

### Technical Specification:

S. No.	Pipe Size	Part No.
1.	3.1/2"-5"	65850
2.	5.1/2"-6.5/8"	65851

## Kelly Bushings

### Kelly Bushing Pin Drive

#### Model: 27 PDHD and 20 PDHD

Spectrum Drilling Tools International specializes in manufacturing Rotary Bushings (including Kelly Bushings), confirming API-7K specifications. We ensure compliance with industry standards.

Our Kelly Bushing models, 27PDHD or 20PDHD, are manufactured following API-7K specifications. They are designed for pin drive Master Bushings, suitable for Rotary Table sizes ranging from 27.1/2" to 49.1/2", Master Bushing with 25.3/4" pin circle 27PDHD of 23" pin circle, 20PDHD. The Kelly Bushing is utilized in drilling operations, particularly in offshore and onshore high torque conditions. It effectively handles Square or Hexagonal Kelly sizes ranging from 3" to 6".

The Kelly Bushing is supplied with the following components:

- Roller Assembly (Pre-fitted)
- Wiper Assembly (Pre-fitted)
- Wrench
- Wear Gauge

Pin Drive Kelly Bushing  
Figure No. 16

### Kelly Bushing Square Drive

#### Model: SDHD

The Kelly Bushing Model SDHD confirms to API-7K specifications for Square Drive Master Bushings, designed for Rotary Table sizes ranging from 27.1/2" to 49.1/2". It is utilized in drilling operations, both Offshore and Onshore, particularly in high torque conditions, and is capable of handling Square or Hexagonal Kelly sizes from 3" to 6".

The Kelly Bushing is supplied with the following components:

- Roller Assembly (Pre-fitted)
- Wiper Assembly (Pre-fitted)
- Wrench
- Wear Gauge

Note: Roller Assembly is compatible with 27 PDHD, 20 PDHD, and SDHD models.  
(All the parts are interchangeable with Varco 27HDP, 20HDP, or HDS models, as well as other Kelly bushings compliant with API-7K standards)

Square Drive Kelly Bushing  
Figure No. 17

## Optional Pin Lock Assembly

The Optional Drive Pin Lock Assembly secures the Kelly Bushing within the Master Bushing, particularly useful for offshore drilling operations employing motion compensators. These lock assemblies are specifically designed for the 27 PDHD series Bushing. To order an assembly, simply add "L" to the part number of the unit.

## Manual Tongs

Spectrum Drilling Tools International specializes in manufacturing Manual Tongs, confirming API-7K specifications. These Manual Tongs are specifically designed for making and breaking connections of tubular goods, ranging from lightweight Tubing Pipes to heavy Drill Pipes and Drill Collar Pipes. The versatility of our Manual Tongs allows for easy assembly for either making up or breaking out, simply by removing the hanger and turning the complete tong over.

Manufactured in strict compliance with the latest edition of API-7K specifications, we ensure that our tongs have superior quality through rigorous testing in our in-house facilities. Each Manual Tong, along with its jaws, undergoes proof-loading testing before being supplied to our customers.

Our dedication to quality spans every stage of production, ensuring that only the finest Manual Tongs reach our users.

We offer four types of Manual Tongs to cover a wide range of pipes, varying from 2.3/8" to 21" in size and torque capacities from 16,000 to 100,000 ft-lbs. These are:

- Manual Tong 16,000 ft-lbs - SDTIMT 16
- Manual Tong 35,000 ft-lbs - SDTIMT 35
- Manual Tong 65,000 ft-lbs - SDTIMT 65
- Manual Tong 100,000 ft-lbs - SDTIMT 100

Manual Tongs

## Manual Tong - 16000 ft-lbs

### Model: SDTIMT-16

The Manual Tong SDTIMT-16 is engineered to handle tubular sizes ranging from 2.3/8" to 7", with a torque capacity of up to 16,000 Ft-Lbs.

#### Part List of SDTIMT-16:

S. No.	Description	P/N
1.	Lever Assembly	MT-1601
2.	Hanger Assembly	MT-1602
3.	Long Jaw Assembly	MT-1603
4.	Latch Assembly	MT-1604
5.	Short Jaw Assembly	MT-1605
6.	Lug Jaw Assembly (Range 2.3/8"-3.1/2")	MT-1606
7.	Lug Jaw Assembly (Range 3.1/2"-5.1/2")	MT-1607
8.	Lug Jaw Assembly (Range 4.3/4"-6.1/4")	MT-1608
9.	Lug Jaw Assembly (Range 5.3/4"-7")	MT-1609
10.	Hinge Pin w/Nut & Cotter Pin	MT-1603-2
11.	Tong Die (Blue Diamond/Pyramid)	MT-1610-B/ MT-1610-P
12.	Snub Line Saver/U Clamp Style Pull Line	MT-1611

## Manual Tong - 35000 ft-lbs

### Model: SDTIMT-35

The Manual Tong SDTIMT-35 is engineered to handle tubular sizes ranging from 2.3/8" to 10.3/4", with a torque capacity of up to 35,000 Ft-Lbs.

#### Part List of SDTIMT-35:

S. No.	Description	P/N
1.	Lever Assembly	MT-3501
2.	Hanger Assembly	MT-3502
3.	Long Jaw Assembly	MT-3503
4.	Latch Assembly	MT-3504
5.	Short Jaw Assembly (Range 2.3/8"-7")	MT-3505
6.	Short Jaw Assembly (Range 7"-10.3/4")	MT-3506
7.	Lug Jaw Assembly (Range 2.3/8"-3.668")	MT-3507
8.	Lug Jaw Assembly (Range 2.7/8"-4.1/4")	MT-3508
9.	Lug Jaw Assembly (Range 3.1/2"-5.1/4")	MT-3509
10.	Lug Jaw Assembly (Range 5.1/4"-7")	MT-3510
11.	Lug Jaw Assembly (Range 7"-8.5/8")*	MT-3511
12.	Lug Jaw Assembly (Range 9.5/8"-10.3/4")*	MT-3512
13.	Hinge Jaw Assembly (Range 7"-8.5/8")	MT-3513
14.	Hinge Jaw Assembly (Range 9.5/8"-10.3/4")	MT-3514
15.	Hinge Pin w/nut, Retaining Pin & Cotter Pin	MT-3503-2
16.	Tong Die (Blue Diamond/Pyramid)	MT-3515-B/ MT-3515-P
17.	Snub Line Saver/U Clamp Style Pull Line	MT-3516

Note: \*Also requires the Hinge Jaw Assembly.

## Manual Tong - 65000 ft-lbs

### Model: SDTIMT-65

The Manual Tong SDTIMT-65 is engineered to handle tubular sizes ranging from 3.1/2" to 17" and has a torque capacity of up to 65,000 Ft-Lbs.

#### Part List of SDTIMT-65:

S. No.	Description	P/N
1.	Lever Assembly	MT-6550
2.	Hanger Assembly	MT-6553
3.	Long Jaw Assembly	MT-6558
4.	Short Jaw Assembly	MT-6562
5.	Latch Assembly	MT-6564
6.	Lug Jaw Assembly (Range 3.1/2"-8.1/4")	MT-6568
7.	Lug Jaw Assembly (Range 8"-11.1/4")*	MT-6569
8.	Lug Jaw Assembly (Range 11.3/4"-14.3/8")*	MT-6570
9.	Lug Jaw Assembly (Range 16"-17")*	MT-6571
10.	Hinge Jaw Assembly (Range 8"-17")	MT-6572
11.	Hinge Pin w/nut & Cotter Pin	MT-6567
12.	Tong Die	MT-6559
13.	Snub Line Saver/U Clamp Style Pull Line	MT-6575

Note: \*Also requires the Hinge Jaw Assembly.

## Manual Tong - 100000 ft-lbs

### Model: SDTIMT-100

The Manual Tong SDTIMT-100 is engineered to handle tubular sizes ranging from 4" to 17" and has a torque capacity of up to 100,000 Ft-Lbs.

#### Part List of SDTIMT-100:

S. No.	Description	P/N
1	Lever Assembly	MT-10001
2	Hanger Assembly	MT-10002
3	Long Jaw Assembly	MT-10003
4	Latch Assembly	MT-10004
5	Short Jaw Assembly	MT-10005
6	Lug Jaw Assembly (Range 4"-8.1/2")	MT-10006
7	Lug Jaw Assembly (Range 8.1/2"-12")*	MT-10007
8	Lug Jaw Assembly (Range 12"-15")*	MT-10008
9	Lug Jaw Assembly (Range 15.3/4")*	MT-10009
10	Lug Jaw Assembly (Range 16"-17")*	MT-10010
11	Hinge Jaw Assembly (Range 8.1/2"-17")	MT-10011
12	Hinge Pin & Nut w/cotter Pin	MT-10003-2
13	Tong Die (Blue Diamond/Pyramid)	MT-10012-B/ MT-10012-P
14	Snub Line Saver/U Clamp Style Pull Line	MT-10013

Note: \*Also requires the Hinge Jaw Assembly.

## Manual Casing Tong

The Manual Casing Tong is manufactured confirming API-7K specifications and is specifically designed to assemble and disassemble connections ranging from 13.3/8" to 36", by extending the required hinge jaws as per the table for Casing Head Assemblies.

This tong is engineered to handle torque capacities of up to 26,000 Ft-lbs. It boasts excellent durability and is crafted from high-grade alloy steel that undergoes rigorous testing as per API-7K specification to ensure reliability and performance.

### Part List of Manual Casing Tong:

S. No.	Description	Identification No.	P/N
1.	Lever Assembly	L1	CT-3501
2.	Hanger Assembly	–	CT-3502
3.	Long Jaw Assembly	L2	CT-3503
4.	Short Jaw Assembly	L3	CT-3504
5.	Latch Jaw Assembly	L4	CT-3505
6.	Latch Assembly	L5	CT-3506
7.	Lug Jaw Assembly	L6	CT-3507
8.	Hinge Jaw Assembly	L7	CT-3508
9.	Hinge Jaw Assembly	L8	CT-3509
10.	Hinge Jaw Assembly	L9	CT-3510
11.	Hinge Pin w/Nut & Cotter Pin for L2, L3 & L5	–	CT-3503-2
12.	Hinge Pin w/ Two Cotter Pin for L4, L6, L7, L8 & L9	–	CT-3505-2
13.	Tong Die	–	MT-1610-P

## Pneumatic Tubing Spiders

Spectrum Drilling Tools International specializes in manufacturing Spiders, confirming API-7K specifications.

Tubing Spiders offer the flexibility of being operated pneumatically or hydraulically, making them widely utilized in the tripping process. They can be conveniently operated using a foot remote control valve, facilitating the lifting and setting of Manual Slips.

Manufactured from high-grade alloy and heat-treated for prolonged product life and superior quality, our Spiders ensure durability and reliability. The Slip Inserts are meticulously designed to firmly grip tubular, complete with a 360° hold.

Available in three models based on different load ratings and gripping sizes: Model C, CHD, and E.

Optional Accessories: Adapter Plate.

## Rotary Slips

Spectrum Drilling Tools International specializes in manufacturing Rotary Slips, confirming API-7K specifications. Our Rotary Slips, or Drill Pipe Slips, are engineered to safely hold the drill string's weight while providing a full range of operations. They play a critical role in transferring the load from the elevators to the Rotary Table.

Spectrum slips are designed to withstand substantial dynamic loading without catastrophic failures, such as slip-toe damage, which could endanger rig crews and slow down operations. Designed for use in standard API Insert Bowls/Slip Bowls, our slips feature an API taper of 4 inches per foot on the diameter. The excellent design ensures that the load is evenly distributed throughout the length of the slips, preventing bottleneck damage to drill pipes. Made from superior, high-quality materials, our Rotary Slips offer great strength and reduced wear and tear, resulting in a longer lifespan.

Manufactured in strict accordance with the latest edition of API-7K specifications, our slips meet and exceed quality standards.

We offer three models of Rotary Slip/Drill Pipe Slip:

- Rotary Slip Short (SDS) – Load Rating: 100 Tons
- Rotary Slip Medium (SDML) – Load Rating: 150 Tons
- Rotary Slip Large (SDXL) – Load Rating: 250 Tons

## Drill Collar Slips

Featuring enhanced wraparound insert designs, Spectrum Manual Drill Collar Slips prevent bottlenecking and gouging damage while providing superior contact and vertical load distribution for drill pipes. Each slip segment is cast with an extra-long back, offering maximum support to the circular button-gripping elements. The multi-segmented drill collar slip is manufactured from heat-treated alloy steel, ensuring exceptional wear resistance and maximum load-carrying capacity. Strong and balanced, these slips are designed to minimize crew fatigue and maintenance, providing extended performance.

Our slips are meticulously designed and manufactured confirming API-7K Specifications. Drill Collar Slips are available in three types, accommodating all popular drill collar sizes ranging from 3" OD to 14" OD.

## Casing Slips

Today's deeper drilling requires long and heavy casing strings, and Spectrum Casing Slips are designed to handle any casing job with ease. Our CMS slips are made from castings and reinforced to withstand severe service conditions. The multi-segment design ensures a self-centered, full wraparound grip that prevents damage to the casing. This design allows for handling casing sizes from 5" to 30" OD by increasing or decreasing the number of segments and dressing the slip with appropriately sized inserts.

Casing Slips have a grip length of 13.1/2" (343mm) and an API taper of 4 inches per foot on the diameter. They are manufactured strictly in accordance with the latest edition of API-7K Specifications.

## Flexible Handles

- Flexible Handles can be easily fitted onto slips without requiring any modifications.
- Flexible Handles offer increased safety during use and are more durable.
- They help reduce the likelihood of bending and breaking.
- Flexible Handles minimize the risk of injury to the crew.

## RHS Rotary Hand Slips

Spectrum Drilling Tools International manufactures the RHS Rotary Hand Slip, a heavy-duty slip widely utilized in deep drilling operations. The RHS Slip features a gripping length of 16.1/2" (419mm) and an API taper of 4 inches per foot on the diameter. It is primarily used to hang off drill pipe during operations such as running in or pulling out of a hole.

The excellent design ensures that the load is evenly distributed throughout the length of the slips, preventing bottleneck damage to drill pipes. Made from superior, high-quality materials, our RHS Rotary Slip offers great strength and reduced wear and tear, resulting in a longer lifespan.

Manufactured in strict accordance with the latest edition of API-7K Specifications, our slips meet and exceed quality standards.

## Pneumatic Backsaver

Spectrum manufactures the Pneumatic Backsaver or Power Slip Lifter, a pneumatically operated power tool designed to lift drill pipe slips. Its purpose is to reduce personnel fatigue and minimize injuries by enabling remote operation from the driller's cabin or stand-alone control panels. Additionally, it extends the life of slips and inserts by properly setting and raising them. The Slip Lifter is compatible with Spectrum drill pipe slips (SDS, SDML & SDXL) ranging from 2.3/8" to 7.5/8", as well as with any other API brand slips.

Pneumatic Backsaver (Power Slip Lifter)  
Figure No. 31

## Technical Specification:

Rotary Table	17.1/2"-37.1/2" Pin drive master bushing API Pin Drive Pitch diameter 654.05 mm
Pipe Size Range	2.3/8"-7.5/8"
Operating Pressure	7 Bar (100 psi)
Type of Slip	Short(SDS), Medium(SDML) & Long(SDXL)

Note: Hydraulic Operated Backsaver is also available on request.

## Type of Adapter

Pneumatic Backsaver can be used with different Adapters as per the type of Slip.

Slip Type	Part No.
Short (SDS)	SLA-01
Medium (SDML)	SLA-02
Long (SDXL)	SLA-03

Pneumatic Backsaver Adapter

## Hydraulic Power Slip (Eq. to PS 500)

### Model: HPS-500

Spectrum Hydraulic Power Slip is engineered to handle long, heavy tubulars ranging from 2.3/8" to 14" and has a capacity of 500 tons. It can be installed in various Rotary Tables, with adapters available for different sizes and types. The Power Slip features a central greasing system and hydraulic feedback for "Slips Up" and "Slips Down" operations.

#### Special Features :

- Slip Assemblies and Insert Carriers are interchangeable with the HPS-500.
- A single HPS-500 body can accommodate a 2.3/8" to 14" tubular range.

Hydraulic Power Slip  
Figure No. 33

#### Technical Specification:

Maximum permissible operating load	500 short ton
Material and Production Standard	API 7K Specification
Pipe diameter	2.3/8"-14"
Rotary Table diameter	37.1/2"
Rotary Table	All Rotary Table with respective Adapter
Hydraulic Working Pressure	Min 160 bar (2321 psi), Max 210 bar (3046 psi)
Hydraulic Flow Rate	Min 18.9 L/min (5 gpm), Max 37.9 L/min (10gpm)

## Spring Loaded Power Slip (Eq. to PS 15)

### Model: SDTISPS-27

The Spectrum Spring Loaded Power Slip (SDTISPS-27) is a foot-operated device designed to eliminate the manual lifting and setting of slips. It uses coil springs as a counterbalance to offset the weight of the slips when in the upper, released position.

The slip can be set simply by applying pressure to the slip set ring and released by pressing the foot pedal. This Power Slip is capable of handling drill pipes and tubing ranging from 3.1/2" to 5.1/2" in size. It is compatible with 27.1/2", 37.1/2", and 49.1/2" Rotary Tables with API standard Pin Drive Master Bushings.

Spring Loaded Power Slip  
Figure No. 34

The unit consists of three major assemblies as follows:

#### 1. Top Cover Assembly:

The Top Cover Assembly is ergonomically designed in two halves with a slip-set ring. It is mounted on four slip hangers with pins for secure attachment.

#### 2. Slip Assembly:

The Slip Assembly consists of four slip segments, each with a 16.1/2" grip length for handling tubular sizes from 3.1/2" to 5.1/2". The slips are equipped with 48 inserts, 4 insert retaining rings, and 8 Allen screws for a secure grip.

#### 3. Bowl Assembly:

The Bowl Assembly is composed of two halves connected by a hinge pin, allowing easy installation and removal of the Power Slip from the Master Bushing. It includes four coil spring cartridges and a foot pedal for releasing the slips.

## Pneumatic Power Slip (Eq. to PS 16)

### Model: SDTIPPS-27

Spectrum manufactures the Pneumatic Power Slip (SDTIPPS-27), an air-operated power slip designed to handle drill pipe and tubing with slip sizes ranging from 3.1/2" to 5.1/2", adjustable by changing inserts. The Pneumatic Power Slip can be controlled either by a lever or a foot-operated remote control valve.

Setting the Power Slip is achieved by a combination of gravity and applied air pressure, while release is facilitated solely by applied air pressure. This eliminates the need for manual setting and lifting of the slip. The Pneumatic Power Slip is compatible with 27.1/2", 37.1/2" and 49.1/2" Rotary Tables equipped with API standard Pin Drive Master Bushings.

### Special Features:

- Ergonomically designed for user-friendliness.
- Operable by a single individual.
- Remote control capability allows operation from a safer distance.
- Enhances crew safety on the rig floor.

The unit consists of three major assemblies as follows:

### 1. Top Cover Assembly:

The Top Cover is designed in two halves and is equipped with two air cylinders connected via a ball floating joint secured with hex head screws. Mounted on four slip hangers with pins, the Top Cover Assembly facilitates smooth operation.

### 2. Slip Assembly:

Comprising four Slip Segments with a 16.1/2" grip length for gripping various tubular sizes, each segment is outfitted with 48 inserts, 4 insert retaining rings, and 8 Allen screws.

### 3. Bowl Assembly:

The Bowl Assembly, comprising two halves connected with a bowl hinge pin, enables easy installation and removal of the Power Slip from the Master Bushing. Equipped with four coil spring cartridges, it ensures efficient slip operation.

### 4. Air Cylinders Assembly:

This assembly includes two Air Cylinders connected to the Top Cover via floating joints. The Air Cylinders facilitate the lifting of the Top Cover Assembly along with the slip assembly.

### 5. Control System:

The Control System incorporates a filter/regulator, inline (pilot-operated) valve, hand-operated pilot valve, quick exhaust valve, and various connecting hoses and fittings. It can be operated via Hand Control or Foot Pedal Control System for enhanced flexibility and ease of use.

## Safety Clamps

### Model: SDTISC

Safety clamps are vital tools that prevent casing, drill collars, tubing, and other tubulars from accidentally dropping into wellbores. Installed above slips or spiders during the initial stages of well installation, they ensure reliable support when string loads are too light for effective slip grip.

Featuring hinged links and spring-loaded dies, safety clamps maintain continuous contact, providing shock absorption and load support. Their tapered mounting system tightens around the pipe if movement occurs, halting any further drop.

Spectrum offers safety clamps for tubulars ranging from 2.7/8" to 36" in diameter. Designed to apply uniform gripping pressure, these clamps protect against damage to thin-walled pipes while ensuring secure and efficient handling during operations.

## Umbilical Bowl & Rotary Slips

Spectrum has introduced an innovative Umbilical/Slotted Insert Bowl specifically designed for 27.1/2" and 37.1/2" Master Bushings. To facilitate the installation of umbilicals, a special Insert Bowl, numbered #2 and #3, featuring a single slot for maximum opening, has been developed.

- Compatibility with SDXL/SDHL or RHS Rotary Hand Slips, resulting in a significantly larger opening for enhanced functionality.
- Enhanced load capacity of up to 750 sTon, ensuring robust performance even under heavy loads.

Compliance with the latest edition of API 7K standards.

### Part No. for Umbilical/Slotted Bowl:

Description	For 27.1/2" Master Bushing	For 37.1/2" Master Bushing
Umbilical/Slotted Insert Bowl No. 3 to handle tubular size 2.3/8" to 8.5/8"	2758-U	3753-U
Umbilical/Slotted Insert Bowl No. 2 to handle tubular size 9.5/8" to 10.3/4"	2757-U	3752-U

### SDXL Umbilical/Slotted Rotary Slip:

Spectrum has introduced the SDXL-Long Rotary Slip with a grip size of 16.1/2", featuring an Umbilical slot tailored for use with Umbilical/Slotted Insert Bowl No. 2 & 3.

Umbilical Bowl & Rotary Slips  
Figure No. 37

Umbilical Bowl

Note: The Umbilical Bowl and Umbilical Slip can also be customized according to customer requirements and designs upon specific orders.

## Venom Shale Shakers

Spectrum Venom Shale Shakers are engineered to deliver high-capacity separation efficiency and operational flexibility, all within a compact footprint. In today's drilling environment, where operational costs are high both Onshore and Offshore, these Shale Shakers are invaluable in reducing costly non-productive time (NPT) and ensuring compliance with stringent environmental regulations.

Designed for premium drilling fluid applications, Spectrum Venom Shale Shakers excel at recovering valuable resources from waste material. They can handle a wide range of solids and fluid compositions and adapt seamlessly to changes in the rate of penetration (ROP) during drilling operations.

Note:

- Motors and Starters are flame-proof, Explosion-Proof, and Weather-Proof and are compatible with specified operating conditions. Certificates such as IEC/ATEX/CE will be provided.
- Customized Shale Shakers are also available on request.

## SuperFlow Shale Shakers

We offer a leading range of cost-effective technologies to minimize the HSE (Health, Safety, and Environment) impact of offshore and onshore drilling activities. Our next-generation SuperFlow Shale Shakers deliver high-performance results, featuring increased capacity and superior solids conveyance. With a compact design, these shakers ensure stable and trouble-free operation, requiring minimal maintenance.

### Key Features of the SuperFlow Shale Shakers:

- The single-sided Screen tension system enables fast screen replacement.
- Single Point Adjustment System streamlines operation.
- Compact design requires minimal headroom.

## Mud Cleaners

Spectrum Mud Cleaners utilize a two-stage separation process to enhance drilling fluid recovery. This design enables our mud cleaners to handle the entire circulating volume, remove dry solids, and retain premium base fluid, which is vital for drilling success.

The two-stage process combines Desander and Desilter hydrocyclones, mounted over a shale shaker, to operate as a single unit. The hydrocyclones perform the primary separation, with the underflow directed onto the shaker screen.

Our mud cleaners are effective for both weighted and unweighted drilling fluids, helping to lower fluid expenses and disposal costs. Spectrum Mud Cleaners enhance drilling efficiency and productivity by optimizing fluid recovery and minimizing waste.

Mud Cleaner

## Mud Agitators

Spectrum offers a comprehensive range of horizontal and vertical mud agitators, with horsepower ratings spanning from 3 to 30. Each unit features an explosion-proof motor coupled to a gearbox, which drives the impeller and shaft to deliver efficient fluid circulation and agitation. The mechanical configuration, horsepower, impeller diameter, and shaft length are customized to tank dimensions and maximum mud weights.

The primary objectives of our meticulously designed mud agitators are to achieve:

- Uniform suspension of all solids
- Optimal application of shear
- Homogeneous fluid properties throughout the system
- Economical use of power

By meeting these key performance indicators, our mud agitators ensure optimal performance, reliability, and efficiency.

## Dies & Inserts

At our company, we leverage customized manufacturing techniques to ensure the highest quality, perfect fit, and extended lifespan for our dies and inserts. Our commitment to excellence is reflected in every step of the process, from superior material selection and precision machining to exceptional heat treatment and stress relief procedures. Our decades of experience in die and insert specialization further enhance the quality of our products.

The innovative design of Spectrum dies and inserts leads to enhanced performance and reduced maintenance costs. By integrating functionality and innovation into the traditional die and insert designs, we create products that perform better, last longer and are more cost-effective.

Our extensive product range includes dies, inserts, and spare parts for a variety of oilfield handling tools, such as:

- Rotary Slips
- DrillCollar Slips
- Casing Slips
- Safety Clamps
- Manual Tongs
- Tubing Spiders
- Power Tongs

We also offer the capability to manufacture customized dies to meet specific requirements.
